(54) PRICE ESTIMATION SYSTEM FOR MULTIPLE SPECIFICATION PRODUCT USING COMMON COMPONENT

(57)Abstract:

PURPOSE: To provide a price estimation system capable of affecting the fluctuation of a factor on an estimation price immediately by inputting design data from a design system, and classifying it to a price decision factor by design and the one by manufacturing.

CONSTITUTION: This system is comprised in such a way that the content of a design condition price decision factor file 120 in the design system 100 is automatically fetched i& a design condition data base 230 in the price estimation system 200 at prescribed time interval via a design data input means 300, and the price estimation on all specifications can be performed immediately by the condition after change when the price decision factor change detecting part 240 of the price estimation system 200 detects the change of the contents of the design condition price decision factor file 120 and a manufacturing condition price decision factor file 220.
